WELCOME

Dear Colleagues:

After the great success of last years' symposium, I would like to personally invite you again to join me and the faculty to the 3rd International Breast Symposium Düsseldorf (IBSD) being held in April 17 - 18, 2015.

Again, we have been able to recruit renowned national and international plastic surgeons and senologists as faculty members, to initiate discussions of current developments in aesthetic and reconstructive breast surgery. We would like to take the greatest opportunity to strengthen the multidisciplinary approach between the colleagues to create a platform for an open discussion from different perspectives on various aspects regarding breast surgery from a clinical as well as a scientific point of view.

Our Symposium will include debates, lectures and round tables about the following Key Topics:

- Controversies in aesthetic breast surgery
- BCT, skin sparing mastectomies and radiotherapy
- Advances in breast reconstruction surgery incl. video session
- The role of plastic surgeons in European breast centers
- Literature and personal experiences in lipofilling
- Challenges in lymphsurgery
- Best case - best safe session with live voting of the audience

Our Goal is to have a lively and informative symposium. The symposium venue, situated on the famous Königsallee, provides again a very special atmosphere.

I would also like to express my gratitude to the members of the faculty. Without their time and support, it would have been not possible to accomplish this interesting program.

I look forward to welcoming you in Düsseldorf.

Kind Regards

Prof. Dr. med. Christoph Andree

CONGRESS APP & TED-SYSTEM

Congress App for iPhone IBSD-2015
www.IBSD2015.com/App

As in the previous year, we would like to provide all visitors of the 3rd Breast Symposium Duesseldorf with an iPhone app again. In addition to information regarding the symposium as well as the general program, the app features the possibility to quickly and easily reach Taxi-Zentral Duesseldorf via a quick button.

BEST CASE – BEST SAFE – IPHONE VOTING

For the first time, there will be a best case- best safe session on Friday from 6 pm to 7 pm during which 6 young surgeons are given the opportunity to present their most difficult case and the appropriate solution. After the presentations, the audience is going to vote on the presentations via the app.

ONLINE QUESTIONS AND TED VOTING

What interests and moves the audience most? We're asking you to let us know by using the app to send anonymous questions directly to the moderators.

How would you decide?

In order to facilitate a discussion that meets with the expectations of the participants, this year we are going to ask for your opinion at the beginning of the session as well as at the end – we are already very much looking forward to the results and to finding out if your opinion changes after listening to the presentations.

Sending messages to moderators, taking part in the voting at the best case - best safe session as well as taking the TED surveys is only possible if the app is installed on your iPhone.
